As a final-year Computer Science student at International University (IU) - VNU, Vietnam National University - Ho Chi Minh city with a strong foundation in software development, I am seeking a Software Engineer position to apply my skills and gain practical experience. I have experience with React, Node.js, Express.js, and Jetpack Compose for mobile app development. I am a fast learner, always determined to achieve my goals, and passionate about development and application/web deployment.

SKILLS

Hands-On Skills	Javascript, Java, C#, Python, NodeJs, FastAPI, ReactJS, Kotlin, Jeckpack Compose, Tailwind CSS, RESTful API, MySQL, MongoDB, Socket.io, Google OAuth, Retrofit, MVC and MVVM models.
Tool	Postman, Docker, Git, Firebase, Jira
Soft skills	English: working proficiency, Agile, and Scrum development, methodology, time management, adaptability, attention to detail, creativity

WORKING EXPERIENCE

Software engineer intern, Bosch Global Software Technologies JUL 2024 — JAN 2025
Software engineering development.

- Description: Intern software engineer in developing internal cutting-edge approval workflow solution called WorkOn with over 800 applications and about 400,000 users.
- Contribution: Delivered multiple applications on Product system using **Javascript** with occasional **Groovy** with **Jira** core scripting using **Java** for advanced functionalities. Collaborated closely with testing teams and customers.
- Learning: Apply cleaning coding, document reading skills, Agile and Scrum process, and working in a professional environment.

PROJECT EXPERIENCE

Full Stack developer / IELTS Learning Application OCT 2024 — JAN 2025
Mobile Application Development project.

- Description: A mobile application that helps users learn English through practical IELTS examinations with an AI chatbot and other features like saving words, highlighting words, etc..
- Contribution: Develop the backend using **Nodejs**, **ExpressJs**. Applying clean architecture and deployment using **Railway**. Using **Kotlin** with **Jetpack Compose** toolkit to implement UI with strictly **MVVM model**. Fetch API using **Retrofit** and handle security with **Google OAuth**. Connect **Gemini API** to application.
- Resource link: [Github](#), [Figma](#)

Backend - Frontend developer / Social Media site APR 2024 — JUN 2024
Web Application project.

- Description: A social media web application based on Instagram with chat, like, sharing image, and other functions.
- Contribution: Set up coding environment, develop API with **MongoDB**, write MongoDB model and authentication using **JSON Web Tokens (JWT)**, create pages and components using **Vite**, implemented logics via **Hooks** associating with **Tailwind CSS** and **Chakra UI frameworks**, deploy web applRender. Using **socket.io** to implement chat and notification function.
- Resource link: [Github](#), [Figma](#)

Candy Escape NOV 2023 — JAN 2024
Data structure and Algorithms project (solo).

- Description: A mobile game similar to Candy Crush using **Unity** to apply DSA theory to practice including **Stack** (using to save pieces after switching for Undo feature), **Queue** (save pieces after using Undo feature), and **LinkedList** (used to store pieces af frame) and other OOP knowledge such as **SOLID principle (Open - Closed principle)** and **Design Pattern (Visitor Design Pattern)** to limit the modifying when scaling up the project.
